

## **TECHNICAL SKILLS & COMPETENCIES**

---

- C#
- PL/SQL
- Python
- Java Programming
- AutoCAD
- Microsoft Office Word
- Microsoft Office Excel
- Microsoft Office PowerPoint

## **EDUCATIONAL**

---

- Post Graduate Diploma, Software Engineering Technology
- Bachelor Degree, Computer Science

## **PROFESSIONAL EXPERIENCE**

---

### Web Developer

- Create and implement visually appealing and responsive user interfaces.
- Translate design wireframes into functional web pages using HTML, CSS, and JavaScript.
- Develop server-side logic and databases to ensure seamless web application functionality.
- Integrate third-party services and APIs to enhance website capabilities.
- Perform routine maintenance tasks and address any issues to ensure optimal website performance

### Quality Testing

- Collaborate with project managers and development teams to understand project requirements.
- Develop comprehensive test plans outlining test cases, test scenarios, and acceptance criteria.
- Perform functional, regression, and system testing to ensure software meets specified requirements.
- Execute manual and automated test cases and document results.
- Identify, isolate, and document software defects, inconsistencies, and issues.
- Communicate effectively with development teams to ensure prompt resolution of identified problems.
